

ControllerBase

```
classDiagram
    class ControllerBase
    class SettingController["Finament.Api.Controllers.SettingController"]
    SettingController --|> ControllerBase
```

The diagram shows a class hierarchy. At the top is the 'ControllerBase' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'Finament.Api.Controllers.SettingController' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment is empty. The bottom compartment contains three public methods: '+ SettingController()', '+ Get()', and '+ Upsert()'. A blue arrow with an open triangular head points from the top of the 'SettingController' class to the bottom of the 'ControllerBase' class, indicating inheritance.

Finament.Api.Controllers.
SettingController

+ SettingController()
+ Get()
+ Upsert()
