

ControllerBase

```
classDiagram
    class ControllerBase
    class FinamentApiControllersExpenseController["Finament.Api.Controllers.ExpenseController"]
    FinamentApiControllersExpenseController --|> ControllerBase
```

The diagram illustrates a class hierarchy. At the top is the 'ControllerBase' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. A blue arrow with a hollow triangular head points upwards from the 'Finament.Api.Controllers.ExpenseController' class to the 'ControllerBase' class, indicating inheritance.

Finament.Api.Controllers.
ExpenseController

- + ExpenseController()
- + GetAll()
- + Create()
- + Update()
- + Delete()
